Additional information: Based on the lists valid at the date of SDS creation.**Exposure controls:****Appropriate engineering controls** Local exhaust ventilation is recommended.**PERSONAL PROTECTIVE EQUIPMENT****General protective and hygienic measures:**

The usual precautionary measures are to be adhered to when handling chemicals.

Respiratory protection:

Isocyanates (contained in this part and when mixed) are known as respiratory sensitisers.

Atmospheric levels should be maintained below the occupational exposure limits. When atmospheric levels exceed those limits or are unknown, respiratory protection is required.

For spray applications in well ventilated areas, use an approved full-face air purifying respirator or a powered air purifying respirator equipped with an organic vapor sorbent filter (EU Type A, NIOSH Black, etc.) and particulate pre-filter (EU Type P2 or P3, NIOSH N95 or better, etc.). A supplied air respirator may also be used and is often the preferred option.

Where spray application in poorly ventilated areas is unavoidable, a supplied air respirator should be used.

For hand applications, unless monitoring data confirms that respiratory protection is not necessary, use an approved half-face air purifying respirator equipped with an organic vapor sorbent filter (EU Type A, NIOSH Black, etc.) and particulate pre-filter (EU Type P2, NIOSH N95, etc.).

For emergency response, an approved positive pressure Self Contained Breathing Apparatus (SCBA) or positive pressure air line with auxiliary self-contained air supply is recommended.

Protection of hands: Protective gloves.
