Project	555 Collins Street Melbourne CBD
Client	Charter Hall
Architect	Cox Architecture
Contractor	Lend Lease
Structural Engineers	Robert Bird Group - Melbourne
GCP Solutions	PREPRUFE® waterproofing system

Project Profile

Creating a benchmark in office buildings

State of the art office building, home to the global tech company Amazon, in the heart of trendy Collins Street and backing onto Flinders Lane. Rising above Melbourne CBD's prestigious Collins Street, the precinct offers 84,000sqm of new Premium Grade office space and 2,300sqm of retail across two stages. With prominent street frontage on Collins street and King Street, alongside direct access to Flinders Lane.

Design and Construct by Lend Lease for this Premium 35 Storey Office Tower and some retails space right in the middle of Melbourne CBD.

With the specification of PREPRUFE® waterproofing from GCP, the stylish and iconic 555 Collins Street building will be protected from water ingress and damage for generations to come.

"With the specification of PREPRUFE® waterproofing from GCP the stylish and Iconic 555 Collins Street building will be protected from water ingress and damage for generations to come."

Providing long-term waterproofing

PREPRUFE® is an advanced membrane system offering the safest and most reliable waterproofing option. Designed with synthetic adhesive layers, the patented ADVANCED BOND TECHNOLOGY™ enables concrete to aggressively adhere to PREPRUFE®, forming a unique intimate seal which prevents any water migration between the waterproofing and the structure, substantially reducing the risk of leaks.

PREPRUFE® protects a substructure from the harmful effects of water, vapor, and gas better than the competition. It can also be applied on wet concrete and is immediately trafficable after installation, which makes for fast and easy installation.

Preserving and protecting iconic buildings is essential for current and future generations, which was why the successful application of PREPRUFE® perfectly demonstrates the importance of specifying a geomembrane to fit the challenge. PREPRUFE® is not only fit for purpose, it is also economically and environmentally sustainable and delivers waterproofing performance like no other system on the market.

Preventing water penetration and migration around the foundations, the application of PREPRUFE® will protect the building and its occupants for many years to come.

Blue360SM Product Performance Advantage.

Because every project, large or small, deserves the best level of protection.

"PREPRUFE® not only fit for purpose, it was also economically and environmentally sustainable and delivered waterproofing performance like no other system on the market."
